

DCH Regional Medical Center

PGY1 Pharmacy Residency

DCH Regional Medical Center offers an ASHP-accredited Postgraduate Year One (PGY1) Residency program based in hospital and primary care practice settings. Residents develop advanced skills as a pharmacotherapy specialist and enhance their teaching, writing, and research abilities. Learning experiences are conducted at DCH Regional Medical Center and University Medical Center. In addition to excellent clinical experiences, an abundance of teaching and lecturing opportunities exists with pharmacy students, medical students, and Family Medicine resident physicians. Residency training is individualized to develop clinical, communication, problem solving, leadership, and general practice skills.

Program Purpose

PGY1 residency programs build upon Doctor of Pharmacy (Pharm.D.) education and outcomes to develop pharmacist practitioners with knowledge, skills, and abilities as defined in the educational competency areas, goals, and objectives. Residents who successfully complete PGY1 residency programs will be skilled in diverse patient care, practice management, leadership, and education, and be prepared to provide patient care, seek board certification in pharmacotherapy (i.e., BCPS), and pursue advanced education and training opportunities including postgraduate year two (PGY2) residencies.

Resident Responsibilities

The program allows the flexibility to select activities which will complement the resident's background and career goals. Learning experiences are typically one month in length and are structured to provide a solid, fundamental experience but are flexible as to recognize individual interests. Residents fulfill 2 order entry/verification and 2 clinical staffing shifts each month. During the year, each resident will complete a research project, MUE, ACPE accredited CE presentation, and a pharmacotherapy lecture presented to the Family Medicine residency program affiliated with DCH...as well as learning experience specific projects or presentations.

Required Learning Experiences

(one month experiences)

Primary Care

Inpatient Medicine I and II

Antimicrobial Stewardship

Critical Care

Emergency Medicine

Administration

Elective Learning Experiences

(one month experiences)

Advanced Critical Care or
Antimicrobial Stewardship

- PGY2 in Critical Care Pharmacy onsite
- Opportunities for desired level of interaction with APPE students
- Opportunities for providing education to pharmacists, technicians, physicians, and nurses
- Optional Teaching and Learning Certificate opportunity
- Very competitive stipend and benefits

Site

DCH Regional Medical Center is a 583-licensed bed, not-for-profit, acute care hospital in Tuscaloosa, Alabama. Centers of excellence include cardiac services, Lewis and Faye Manderson Cancer Center, SpineCare Center, Women's Services, and many others. The Pharmacy Department is dynamic and progressive in its approach to providing pharmaceutical care. Pharmacy services are decentralized with pharmacists and technicians in the patient care environment responsible for clinical and distributive functions. Additionally, clinical pharmacists round with physicians, nurses, and case managers to provide comprehensive patient care throughout the hospital. The Pharmacy Department is affiliated with Auburn University Harrison College of Pharmacy and Samford University McWhorter School of Pharmacy.

Applicant Information

Applicants must be a graduate or candidate for graduation of an ACPE accredited college of pharmacy and be eligible for licensure as a pharmacist in the State of Alabama. Four residency positions will be available beginning the end of June for a 12-month appointment. The stipend is \$59,280 annually and residents are eligible for full hospital staff benefits including comprehensive medical/dental insurance and 23 days paid-time-off during the year.

The 2027-28 PGY1 residency year will be June 21, 2027 through June 23, 2028.
