

Vaccine or Mask: Protecting You from the Flu

Employees will be wearing either a pink sticker on their badge or a surgical mask during flu season. The pink sticker means the employee chose to get a flu shot. Employees who did not get a flu shot are required to wear a mask for everyone's protection.

Protecting our patients and visitors from the flu is another way DCH is caring for our patients and families. Remember, a flu shot and handwashing can help keep you healthy during flu season.
